ASSEMBLY INSTRUCTIONS FOR:

OZONE: GOOD UP HIGH, BAD NEARBY

SUPPLIES:
Scissors
Laminator
Velcro (white or clear dots work best)

1. Print the Game board. Recommended size is 24 by 36. Adhere the print to a foam core board. I use Scotch Super 77 adhesive spray, but any glue should work.

2. Print the Game pieces and cut them out. Final game piece diameter should be close to 5 3/4 inches. If available, laminate the pieces. This will make the game look nicer and last longer.

3. Attach one side of the velcro to the center of each circle on the backboard, shown here with X’s.

4. Place a piece of Velcro on the middle of the back of your laminated pieces.

YOU’RE FINISHED!
